DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 11/07/2007 has been entered.
2. Applicant submitted new PTOL-1449 along with the RCE, which is filed on November 7, 2007, which has been considered, and no proper art is found which is relevant to the allowed claims 1-5, 7-10 and 12-14, and, thus, claims 1-5, 7-10, and 12-14 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an

amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Melvin Kraus on January 10, 2008.

The application has been amended as follows:

Please amend claim 9 as follows:

Please insert - - having different portions - - between "a buffer" and "with different thicknesses" in line 3.

Allowable Subject Matter

4. Claims 1-5, 7-10 and 12-14 are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. The prior arts of record fail to teach or suggest a stamper and transfer apparatus as defined in the claims of the instant application. The closest prior arts Okazaki et al. (U S Patent No. 4,723,903) and JP 10-283681 (which is cited by Applicant on IDS/PTOL-1449, filed on November 07, 2007) discloses a buffer which is disposed on a side of the stamper layer, wherein the buffer having uniform thickness, but fail to teach or suggest that a buffer has a first portion overlying a first part of the concave-convex pattern, and a second portion overlying a second part of the concave-convex pattern, wherein the

first portion and the second portion have different moduli of elasticity as defined in claim 1; further fail to teach or suggest that the buffer extending in a plane and having different moduli of elasticity at different portions of the plane as defined in claim 2 (which means that the buffer in a plane having different portions with different moduli of elasticity); and further fail to teach or suggest that the buffer having different portions with different thicknesses is formed on a back side of the stamper opposite to the side thereof on which the concave-convex pattern is formed as defined in claim 9 of the instant application.

7. Nor does there appear to be any reason in the references, or combined with any of the other prior art of record, to modify the stamper to result in such a combination.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
